Kit (this listing)	Printer + 200 sheets + carry case

Know this for the live: it prints on **special thermal paper** (not regular copy paper) — that's how it runs with no ink. Thermal prints can fade over time in heat/sunlight, so it's best for everyday/temporary docs. The **203 DPI** is great for text; for sharper photos, point them to the **300 DPI MT800**.
